

GSA IT Schedule 70 Pricelist – Products

STC GSA Contract #GS-35F-0548S

Product Code	Product Name	Software Description	SIN 132-32 GSA Price	SIN 132-34 GSA Maintenance Price	Equipment List	Documentation
X.4Sight	4Sight 	Automated data analysis, decision support, early warning, and notification product suite that leverages electronic data to provide: public health disease surveillance and early warning; occupational health surveillance and early warning; food and product safety consumer alerts; and pharmacovigilance analysis solutions. Uses a growing collection of innovative information technologies to develop and implement client-specific solutions, including timely and automated data integration and fusion, aberration detection, GIS, role-based notification, and alerting. The system examines symptom patterns over time and uses data from emergency departments, EMS runs, complaints, OTC drugs, prescriptions, and absenteeism to provide early warning for possible disease outbreaks or bioterrorist events. User-defined alerts are generated based on changes in the public's health status. Automated notification is provided. The core component supports links to 25 users.	\$ 375,000	\$ 75,000	Internet browser-based	User Manual
X.4Sight1	4Sight License Pack	Additional User Licenses, Block of 25, for 4Sight (X.4Sight).	\$ 75,000	\$ 15,000	N/A	User Manual
X.AC	Address Cleaner	This corrects addresses in SIIS, CDR, Surveillance, and PHIN databases to eliminate errors and format the address close to the USPS standard. The Address Cleaner can be used in conjunction with the in-line Geocoder to improve geocoding success rates significantly.	\$ 6,828	\$ 1,366	N/A	Technical Manual
X.ACTNS	Alternative Collaboration Treatment Network Solution (ACTNS)	A Web-based clinical case management system structured for long-term case management of clients who are shared between multiple providers offering complimentary and/or wrap-around services within a mental health or substance abuse treatment network. This application incorporates all the processes of intake, consent, assessment and summary, treatment and progress tracking, chart review, and discharge. Structured tools are provided to assist in the creation of specialized treatment programs and treatment planning. ACTNS contains features such as notifications, business rules, and workflow to help healthcare agencies meet Commission on Accreditation of Rehabilitation Facilities (CARF) and Joint Commission on Accreditation of Healthcare Organizations (JCAHO) standards requirements. The system also facilitates the tracking of the step-through process and organizes separate program enrollments under a primary client life.	\$ 258,500	\$ 51,700	Internet browser-based	User Manual
X.AD	Surveillance-Animal Disease Reporting	Web based animal disease reporting and tracking system designed to provide early warning and alert for diseases that will directly impact humans. Veterinarians to state public health staff can enter data. The core component supports links to 25 users. Licenses are available in	\$ 255,636	\$ 51,127	Internet Browser-based Relational backend	User Manual On-line Help

Current through Contract Modification #PO-0005, effective March 10, 2009

Product Code	Product Name	Software Description	SIN 132-32 GSA Price	SIN 132-34 GSA Maintenance Price	Equipment List	Documentation
		blocks of 100.			database	
X.AD100	Surveillance-Animal Disease Reporting License Pack	Statewide License for Surveillance-Animal Disease Reporting (X.AD).	\$ 274,450	\$ 54,890	N/A	N/A
X.AD Hub	Animal Disease Hub	Integration tool for 3rd party animal disease surveillance systems. DEPRECATED.	\$ 274,450	\$ 54,890	N/A	Technical Manual
X.ADHD Interface	Animal Disease/Human Disease Interface	Integration between animal disease and human disease reporting systems for alerting, mapping, case entry and retrieval, contact tracing, and reporting.	\$ 83,050	\$ 16,610	N/A	Technical Manual
X.BS	Bio Metric Search	Utilizes industry standard bio metric technology (fingerprint recognition) to store and conduct patient searches using fingerprints. Does not include Fingerprint Reader hardware.	\$ 82,500	\$ 16,500	Fingerprint Reader	Technical Manual
X.CA	Children Administration System	A Web-based system to track foster homes, children referrals, and relocation of Children in out-of-home placements. The system supports the user in finding suitable placements for these children through the use of demographic data in GIS. The system is java based and uses Oracle and ArclMS as third party tools. The core component supports links to 25 users. DEPRECATED.	\$ 180,895	\$ 36,179	Internet Browser-based	User Manual
X.CDR/ANNOUNCE	Communicable Disease Reporting Announcement Module	Live one-way supervisor announcement module. DEPRECATED.	\$ 39,050	\$ 7,810	N/A	Technical Manual
X.CDR/MAIL	Automated Letter Generation	Letter generation and mail merge capability integrated into work processes. Requires X.CDR/FLOW. DEPRECATED.	\$ 49,610	\$ 9,922	Internet Browser-based	User Manual On-line Help
X.CDR/MOBILE	Mobile CDR Client	X.CDR autonomous laptop client that can download work from X.CDR systems, perform case processing in the field, and upload case data to central system. 10 Users. DEPRECATED.	\$ 181,500	\$ 36,300	Internet Browser-based	User Manual On-line Help
X.CHCT	Child Health Check Tracking	Application to support collection of child health program data, such as Early and Periodic Screening, Diagnostic and Testing (EPSDT), for children 0-21 years of age.	\$ 211,750	\$ 42,350	Internet Browser-based	User Manual
X.COLTS	Cabinet Office Legislative Tracking System	Supports the life cycle of proposed legislation from development, review, flow, and tabling. Legislative calendar, workflow support, and controlled document access are key features. DEPRECATED.	\$ 215,050	\$ 43,010	Internet browser-based	User Manual
X.CRA/ARM	CRA Aggregate Reporting Module	This Countermeasure and Response Administration (CRA) Aggregate Reporting Module is designed to work directly with IWeb, Mass Immunizations Web Version, and the Mass Immunizations Standalone Windows Version applications to capture and report on countermeasures administered during an emergency response effort or drill exercise. Information captured and aggregated for countermeasure recipients includes associated campaign, recipient tier, dosage group, and age group. The module includes an export that	\$ 175,000	\$ 35,000	Internet browser-based	User Manual

Product Code	Product Name	Software Description	SIN 132-32 GSA Price	SIN 132-34 GSA Maintenance Price	Equipment List	Documentation
		complies with CDC reporting requirements that can be uploaded into CDC's CRA application to include: partner ID, reporting organization, campaign/event, countermeasure administered, manufacturer/lot number, age groups, recipient tiers and dosage group. It includes aggregate and patient level reports and the ability to generate reminder/recall based on campaign and countermeasure.				
X.CRTS	Critical Resource Tracking System	The CRTS is a Web enabled application that tracks the availability of resources during a medical emergency event, or for routine tracking of medical resources. Medical resources include hospitals and number of beds available in the categories of: ER, ICU, regular and pediatric. The interface is designed to require minimal familiarization by users who may be new to the application during emergency events. It includes both a user interface for updates by hospital personnel, as well as an operator interface to define events, create users and healthcare sites. In addition, an XML formatted specification is included for automated data exchanges from hospital systems to the CRTS. DEPRECATED.	\$ 87,120	\$ 17,424	Internet Browser-based	User Manual On-line Help
X.DD	De-duplication System	A new public health, user friendly set of tools for identifying duplicate patients in a SIIIS, CDR, NEDSS, and PHIN database. Supports real-time and batch data entry into a centralized repository. Includes a GUI to support manual review of potential duplicates. Automatically merges identified duplicates. Based upon probabilistic models. Can be integrated with any public health data set. Requires Master Patient Index (MPI).	\$ 124,166	\$ 24,833	N/A	User Manual
X.Diplomat	Diplomat	The DIPLOMAT (Data Interrogation, Parsing, & Linking Of Multiple Abstruse Types) is a program that converts laboratory reports exported from LITS Plus and various other Laboratory Information Management Systems (LIMS), in comma or pipe separated ASCII files (.csv), into the CDC mandated Laboratory-Based Reporting of Public Health Information format, using Version 2.3z of the Health Level Seven (HL7) standard, for transmission from laboratories to state National Electronic Disease Surveillance Systems (NEDSS). DIPLOMAT is written in Visual Basic and runs under Windows 98SE / 2000 / XP / 2003 environments on standard desktop computers or servers. It is also available with an option to use the HTTPS "Post" to send the converted data to a specific URL. - Price \$40K for 10 licenses/\$3K per license after that or \$5k per single license.	\$ 48,400	\$ 9,680	N/A	User Manual
X.DTT	Data Translation Tool	Stand-alone tool that provides file translation capabilities from a provider PMS's natively generated export file to an immunization Central Registry.	\$ 31,041	\$6,208	N/A	User Manual
X.DTT SUITE	Data Translation Suite	The Data Translation Tool (DTT) imports batch data in the form of delimited or fixed width text files into the central registry and "translates" these files into the acceptable format required for import. Patient demographics, vaccinations, physicians, facilities, lead screening and address correction data are supported. Accepts ASCII test, HL7, and XML formats.	\$ 78,650	\$ 15,730	N/A	User Manual

Product Code	Product Name	Software Description	SIN 132-32 GSA Price	SIN 132-34 GSA Maintenance Price	Equipment List	Documentation
X.DTT+	Data Translation Tool Plus	Integrated module to support electronic exchange of records using XML, HL7. Complete solution for CDR/lab integration. Includes translation, transportation and loading issues. Product includes X.DTT, X.Diplomat, and X.HL7 Bridge.	\$ 113,135	\$ 22,627	N/A	User Manual
X.ED	Event Detection	Event detection system uses data from emergency departments, EMS Runs, complaints, OTC drugs, prescriptions, as well as absenteeism, to provide early warning for possible disease outbreaks or bioterrorist events. This surveillance system examines symptom patterns over time. User-defined alerts are generated based on changes in the public's health status. Automated notification is provided. The core component supports links to 25 users. DEPRECATED.	\$ 255,636	\$ 51,127	Internet Browser-based Relational backend Database	User Manual On-line Help
X.ED1	License Pack	Licenses are available in blocks of 100. DEPRECATED.	\$ 255,636	\$ 51,127	N/A	User Manual On-line Help
X.EH	Surveillance-Environmental Health	Web based system to track licensing and inspection of public facilities. Supports enteric disease investigation as well as vector control and management such as mosquito tracking of West Nile and Dengue Fever. Complaint tracking, integrated GIS, support for field workers to senior level managers. Core product supports 25 users. User licenses in blocks of 25 available.	\$ 334,393	\$ 66,879	Internet Browser-based Relational backend database	User Manual On-line Help
X.EPHTNA	Environmental Public Health Tracking Network Application	Core component for a Web-based PHIN/NEDSS-compliant, environmental public health tracking network application. Provides authenticated users with the ability to query and analyze environmental hazard and exposure and health outcomes data through an Internet-based user Interface. Also offers a variety of data display options including tables, graphs, charts, and maps.	\$ 232,396	\$ 46,479	Internet Browser-based	User Manual On-line Help
X.EPHTNA/CDR INTERFACE	Environmental Public Health Tracking Network Application - CDR Interface	Can be customized and integrated into local statewide surveillance systems to include linkages with statewide CDR systems.	\$ 54,450	\$ 10,890	N/A	Technical Manual
X.EPI FORMS	Epidemiological Forms Generator	Turnkey solution based on FMS suite. On-line tool that supports epidemiological response and case investigations. Allows creation of case specific forms that electronically link to an adaptive database. Supports efforts in emerging diseases such as West Nile and SARS as well as bioterrorism. Core system supports 25 users.	\$ 232,925	\$ 46,585	Internet based RDBMS	User Manual On-line Help
X.ES	Electronic Signature Interface	Within a public health system, the capability to electronically capture and store signatures is provided by this product. Used for both paper reductions and consent storage. Signatures and documents are encrypted as one entity to ensure confidentiality of client signatures. Does not include signature pads.	\$ 93,489	\$ 18,698	Internet Browser-based Relational backend database	User Manual On-line Help
X.FM	Feedback Module	An automated user feedback and alert system. Integrates with SIIS, CDR, NEDSS and HAN projects providing electronic notification to registry users. Reports, maps, and information alerts can be	\$ 62,083	\$ 12,417	N/A	User/ Administrator Manual

Current through Contract Modification #PO-0005, effective March 10, 2009

Product Code	Product Name	Software Description	SIN 132-32 GSA Price	SIN 132-34 GSA Maintenance Price	Equipment List	Documentation
		electronically sent to users. A system administration tool allows specific reports and frequencies to be defined. Information can be sent by fax or as email attachments.				
X.FM SA	Forecasting Module – Stand Alone	This STC immunization registry forecasting module can be integrated with 3rd party population-based registries (SIIS, 3rd Party Insurance Registries, etc). It complies with recommended ACIP schedules and vaccines.	\$ 150,000	\$ 30,000	Internet Browser-based	User Manual
X.FMS	Forms Management System	Ability to build customized forms and export form data in standard file formats. Includes form vocabulary management module which integrates with CDC VADS. Core system supports up to 25 users.	\$ 222,497	\$ 44,499	Internet Browser-based	User Manual Technical Manual On-line Help
X.FMS/CDR	Forms Management System - CDR Integration	Integration with CDR. DEPRECATED.	\$ 53,350	\$ 10,670	N/A	Technical Manual
X.FMS/FP.CUSTOM	Forms Management System - Form Package	Custom-built form. DEPRECATED.	\$ 5,500	\$ 1,100	N/A	User Manual
X.FMS/FP1	Forms Management System - Form Package 1	Form Package 1. Up to 30 standard disease surveillance forms.	\$ 57,750	\$ 11,550	N/A	User Manual
X.FMS/FP2	Forms Management System - Form Package 2	Forms for use with synchronous and asynchronous devices. DEPRECATED.	\$ 57,750	\$ 11,550	Handheld devices and Smartphones	User Manual
X.GATE	Communication Gateway Server	A new extraction, translation, and loading (ETL) tool broker that supports a state use license. Adheres to HL7 standards and supports the PHIN and CDC NEDSS initiatives. Supports controlled user access to SIIS. DEPRECATED.	\$ 62,083	\$ 12,417	N/A	User Manual
X.GISLINK	GIS Link	Web-based user interface to GIS. Includes point and click tools to allow non-GIS users to easily create maps specific to data that is available in a public health database or registry. Works with standard browsers. Requires ESRI's ArcIMS or ArcGIS products.	\$ 74,500	\$ 14,900	Internet Browser-based	Technical Manual
X.HCF	Health Care Facility Module	Health Care Facility Module facilitates reporting and managing of the reportable public health events by health care facilities such as hospitals and public and private providers. The module is seamlessly integrated with SENTINEL. It enables secure reporting of the event information, including patient demographics, condition, event dates, and related information. Additional features include the ability to enter condition-specific laboratory reports, search, print, and export case information.	\$ 45,000	\$ 9,000	Internet browser-based	User Manual
X.HL7/API	HL7/API	A Java API that allows for rapid development of HL7 version 2 interfaces in Java applications. Supports Lab and Immunization messages right out of the box. (Other domains would require initial	\$ 82,500	\$ 16,500	N/A	Technical Manual

Product Code	Product Name	Software Description	SIN 132-32 GSA Price	SIN 132-34 GSA Maintenance Price	Equipment List	Documentation
		configuration, either by purchaser or by STC.)				
X.HL7/TOOLKIT	HL7 Toolkit	A set of simple Java programs to assist in HL7 evaluation, reporting, and on-site transformations. Toolkit includes: <ul style="list-style-type: none"> • HL7 Split: split HL7 messages into separate files for each type of segments found. • HL7 Histogram: create quick report on frequency of what is found in a given HL7 segment. • HL7 DFT Transform: transform DFT messages into VXU messages, filtering out non-immunization codes, in preparation for sending to registry. • HL7 Break: break HL7 file(s) into separate files with a reduced number of messages per file. 	\$ 49,500	\$ 9,900	N/A	Technical Manual
X.HL7BRIDGE	HL7 Connection Bridge	Many HL7 enabled systems are designed to work within local networks and do not provide support for secure transactions across the public Internet. The HL7 Connection Bridge solves this problem by receiving HL7 messages from a local system and forwarding it on to its destination using a secure HTTPS connection. The HL7 Connection Bridge supports Minimum Lower Layer Protocol (MLLP) and CIRSET's standard for secure transport over HTTPS.	\$ 30,250	\$ 6,050	Internet Browser-based	User Manual On-line Help
X.HL7BS	HL7 Border Solution	Vaccination facilities located near state borders routinely serve out-of-state patients but do not normally have access to out-of-state immunization registries. The HL7 Border Solution allows two immunization registries to "share" a cross-jurisdiction area. Both registries could define cross-jurisdiction areas, where patients who received vaccinations would have their vaccination records shared with both state registries. The border vaccination clinic would always see the most complete record, whether the patient received vaccinations in the local or neighboring state. DEPRECATED.	\$ 54,450	\$ 10,890	N/A	User Manual On-line Help
X.HL7CP	HL7 Communication Platform	The HL7 Communication Platform is designed to provide a Web-enabled HL7 interface and testing platform for state immunization registries. The HL7 Communication Platform is designed to provide a Web-enabled HL7 interface and testing platform for state immunization registries. This platform allows a registry to: <ul style="list-style-type: none"> • Accept VXU messages (Patient Vaccination Record Update) • Accept ADT messages (Patient Record Update, sent by hospitals) • Accept DFT messages (Patient Billing Transaction, sent by billing systems) • Respond to VXQ queries (Query for Patient Vaccination Record) • Accept messages via a real-time HTTPS connection • Accept messages through a web-based file upload • Includes web-based testing and conformance tools for HL7 messages. <p>With this platform installed, a state registry would become HL7 compliant and HL7 conversant. The state registry could do the following things:</p>	\$ 54,450	\$ 10,890	Internet Browser-based	User Manual

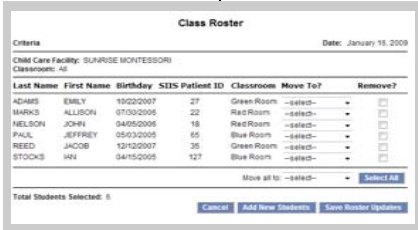

Product Code	Product Name	Software Description	SIN 132-32 GSA Price	SIN 132-34 GSA Maintenance Price	Equipment List	Documentation
		<ul style="list-style-type: none"> • Accept patient vaccination records from other immunization registries or from private providers who track immunizations. • Accept birth records from hospitals • Accept updates from provider billing systems that would include vaccinations administered • Respond to other immunization registries when queried for vaccination records • Have the flexibility of a real-time connection or a simple-to-use web interface for user upload. 				
X.HL7Test	HL7 Test Platform for Immunization Messages	Because HL7 is such a flexible standard that differences between vendor implementations range from subtle to severe. The HL7 Test Platform greatly simplifies this interface integration by providing a large number of HL7 tools and documentation such as an HTTPS real-time interface, a message constructor, a message quick view, a detailed transaction debugger, code table listings, and messages received log. DEPRECATED.	\$ 30,250	\$ 6,050	Internet Browser-based	User Manual On-line Help
X.HPM	Health Promotions Module	The Health Promotions Module allows registry data to be used to send health related mailings. Age based mailings are identified by the module, which then creates an output file that can be used by on-demand printing and shipping companies. The module also includes five data quality reports. These reports will check for invalid or incomplete addresses, names, and language preferences. Included in the module is the Address Correction System interface, which uses information returned by the United State Post Office for patients who have moved with a forwarding address.	\$ 54,450	\$ 10,890	Internet Browser-based	User Manual On-line Help
X.IDFACS	Improvement District Financial Accounting Computer System (IDFACS)	Improvement District Financial Accounting Computer System. This client-server solution allows the management, and reporting of ownership interests in land tracts. The system facilitates transfer of monetary and acquired interests in these land tracts. Deeds and liens related to Indian Lands Consolidation Act of 2000 (ILCA) can be created based on transfer of all or part of the interest in inventoried tracts. Subsequent lien payments are accepted and tracked until satisfaction. The system has integrated GIS. The system is based on MS Visual Basic and utilizes MS Access, Word, and ESRI's MapObjects. Future versions of IDFACS will utilize Oracle 8.0 (or later) or MS SQL Server 2000 in place of MS Access. DEPRECATED.	\$ 102,172	\$ 20,434		
X.IG	In-line Geocoder	Geocoding tool that is integrated into data streams to assign XY coordinates to demographic address data prior to loading into centralized databases, such as, SIIS, CDR, NEDSS, and PHIN. The product can support batch and single record loads.	\$ 18,624	\$ 3,725	N/A	Technical Manual
X.IPHS.Interface	Integrated Public Health System Interface	Links the Integrated Public Health System (IPHS) with the IWeb Immunization Registry system. Provides real-time workflow information to the clinic vaccination staff as the information is entered into the IPHS by administrative or other staff. Allows the clinic staff to view the list of patients waiting for service and the demographics of	\$ 90,750	\$ 18,150	N/A	User Manual

Product Code	Product Name	Software Description	SIN 132-32 GSA Price	SIN 132-34 GSA Maintenance Price	Equipment List	Documentation
		the patients. Clinic staff can use IWeb to select the correct patient as provided by the IPHS and complete the data entry for the patients' vaccinations. Reports include encounter forms and as well as state specific forms such as consent forms.				
X.IRCAP	IRCAP	Immunization registry communication bridge to capture immunization records from a public health registry and provide to 3 rd party electronic medical and personnel health record systems.	\$225,000	\$ 45,000	Internet Browser-based	User Manual
X.IRHealthTrack	IRHealthTrack	Medicaid health information exchange data system and tools to support prevention programs leveraging information within public health immunization registries.	\$350,000	\$ 70,000	Internet Browser-based	User Manual
X.ISSECC	Incident Surveillance-System and Epidemiologic Command Center	Diverse sets of surveillance systems and capabilities are merged into a decision support system designed to provide public health officials with integrated information on which to base decisions in support of emergency preparedness, bioterrorism, or outbreaks. Integrated tools include GIS, statistical, ad hoc reporting, automated alerts and notifications. This Epidemiologic Command Center provides staff with the ability to monitor and manage public health specific events. The core component supports links to 5 users. Licenses are available in blocks of 25.	\$ 438,232	\$ 87,646	Internet Browser-based Relational backend database	User Manual On-line Help
X.ITEMS	Individual Tracking and Evaluation/ Monitoring System	Integrated with an immunization registry, this application tracks the demographics and vaccinations for personnel authorized to respond to public health emergencies. Tracks multiple contact information (e.g., alternate phone numbers, e-mail addresses), and responder type. Reports on vaccination status by responder.	\$ 73,039	\$ 14,608	N/A	User Manual
X.IWEB	Web based registry interface	Web-based interface to SIIS. Allows for adding, editing, deleting, and querying patients. Forecasting and reminder recall is included. Includes full reports. Supports up to 200 enrolled registry users. User licenses in blocks of 500 are available. A statewide license can be purchased.	\$ 310,415	\$ 62,083	Internet Browser-based Relational backend database	User Manual On-line Help
X.IWEB1	IWeb License Pack	Additional User Licenses Block of 1,000 for IWeb (X.IWEB).	\$ 372,497	\$ 74,499	Internet Browser-based	User Manual
X.IWEB BC	IWeb Barcoding Solution	A 1-D and 2-D barcoding solution for scanning in support patient demographics and vaccine managements. Includes IWeb capabilities to scan but does not include scanning hardware.	\$ 95,000	\$ 19,000	Internet Browser-based	User Manual
X.IWEB BILL	IWeb Third Party Billing Module	Used to create web based, automated, third party billing files from the immunization registry. Can be used to bill Medicare, insurance companies. Includes a Profile Administrator that will allow the	\$ 74,415	\$ 14,883	Internet Browser-based	User Manual

Current through Contract Modification #PO-0005, effective March 10, 2009

Product Code	Product Name	Software Description	SIN 132-32 GSA Price	SIN 132-34 GSA Maintenance Price	Equipment List	Documentation
		configuration for different organizations and payees.				
X.IWEB CCM	IWeb Child Care Module 	Integrated IWeb module that gives child care providers the ability to access children's records, track vaccination histories, assess compliance with state child care attendance requirements and conduct appropriate follow up to achieve/maintain appropriate coverage levels within the child care facility. Also contains reporting tools for oversight and assessment by appropriate state staff or designees and generates output that can be used for annual CDC reporting requirements.	\$ 36,300	\$ 7,260	Internet Browser-based	User Manual
X.IWEB DSM	IWeb Database Scrambler Module (DSM)	DSM provides a training and testing environment for SIIS users without disclosure of patient confidential data, and an operational system with information integrity (the spatial and temporal patterns of vaccination records are ensured valid as before scrambling) without confidential patient data. Using the existing data from the SIIS Registry, the DSM is able to keep GIS map functionalities using the geocoded data as well as keep the integrity of the vaccination record. The program has been developed to scramble the patient confidential data in different database tables. Here the 'scramble' means that the original confidential data fields are replaced while still keeping the data format valid. The dynamic relationship among tables is kept consistent. All the data fields with patient confidential data (such as Names, personal IDs, file IDs, phone numbers, addresses) are scrambled. The program also backs up the original data.	\$ 45,375	\$ 9,075	Internet Browser-based	User Manual
X.IWEB DW	IWeb Data Warehouse and Ad Hoc Reporting system	A datamart that provides decision support and ad hoc reporting functionality.	\$ 125,000	\$ 25,000	Internet Browser-based	User Manual
X.IWEB EOC	IWeb Emergency Operations Center Dashboard	A "dashboard" that provides consolidated view and projections for patient flows, vaccine inventory, and aggregate patient demographic information in real time for multiple PODs during an event or campaign.	\$ 155,000	\$ 31,000	Internet Browser-based	User Manual
X.IWEB NH	IWeb Nursing Home Module	Integrated IWeb application geared towards nursing homes and the collection, reporting, and outreach associated with shots typically given in nursing home environments (e.g., influenza, pneumococcal, hep B, tetanus).	\$ 66,550	\$ 13,310	Internet Browser-based	User Manual
X.IWEB PERSONAL	IWeb Personal Immunization Module (MyIMZ)	Allows personal access to one's own immunization records. Using appropriate security and authentication technologies, process, and policies, MyIMZ establishes an immunization Personal Health Record accessible using standard internet access. Utilizes Microsoft's HealthVault application.	\$ 145,000	\$ 29,000	Internet Browser-based	User Manual

Product Code	Product Name	Software Description	SIN 132-32 GSA Price	SIN 132-34 GSA Maintenance Price	Equipment List	Documentation
X.IWEB POST	IWeb External User, Post-Event Interface	An interface that provides a simplified web-based Graphical User Interface for specific use by out-of-state entities given access to the Louisiana Immunization Network for Kids Statewide (LINKS) during emergency responses and the resulting displacement of Louisiana citizens to other states. Eliminates the need for new, temporary users to be trained on the full LINKS application. Allows out-of-state users to look up patients, print the vaccination history, enter new vaccinations, and save the new vaccinations.	\$ 135,000	\$ 27,000	Internet Browser-based	User Manual
X.IWEB PTM	IWeb Provider Tracking Module	Provides for data entry, tracking, and reporting of tasks associated with provider recruitment. Key functionality includes: <ul style="list-style-type: none"> • Tracks providers site information, materials sent, enrollment/recruitment progress. • Track status of vendors who are developing exports for patient management systems. • Generate task lists and associated follow up tasks (vendors or providers). • Maintain schedules of user training. • Schedule users for specific trainings and track their attendance. • Provides help desk functionality such as tracking calls and generating frequently asked question lists. 	\$ 90,750	\$ 18,150	Internet Browser-based	User Manual
X.IWEB SA	IWeb – Stand Alone (IWeb SA)	Java, Oracle based, local copy of IWeb. Used for sites not having consistent internet connectivity. Provides the capability to manually query, send batch data, and request batch data updates. All standard capabilities exist to include patient/shot entry, reports, vaccine inventory. Statewide Note: prices do not include Oracle licenses.	\$ 30,250	\$ 6,050	Internet Browser-based	User Manual
X.IWEB SA 1	License Pack	Individual License	\$ 2,253	\$ 451	Internet Browser-based	User Manual
X.IWEB SA 2	Provider Site License Pack	The Provider Site License supports up to five users in a single provider's office.	\$ 6,828	\$ 1,366	Internet Browser-based	User Manual
X.IWEB SIF	IWeb Schools Interoperability Framework Interface	Interface between school student information systems and IWeb using the Schools Interoperability Framework (SIF) protocol supported by the U.S. Department of Education. Allows schools and/or State DOE to send demographic information for children of consenting parents to IWeb. SIF protocol (v2.0) does not support vaccinations, so demographic information is loaded through a flat file import and matches on the Student ID number. As the SIF protocol for medical information is defined, the SIF Interface in IWeb will be revisited to include support for student vaccination histories.	\$ 75,000	\$ 15,000	Internet Browser-based	User Manual
X.IWEB SNM	IWeb School Nurse Module	Integrated IWeb module. Provides school nurses specific access to generate annual school immunization data reports using registry data. Children can be categorized and reported on, in the following groups:	\$ 36,300	\$ 7,260	Internet Browser-based	User Manual

Current through Contract Modification #PO-0005, effective March 10, 2009

Product Code	Product Name	Software Description	SIN 132-32 GSA Price	SIN 132-34 GSA Maintenance Price	Equipment List	Documentation
		<ul style="list-style-type: none"> • Kindergarten • First Grade • ECE/Pre-K (Early Childhood) • Other First Time Entersers (Grades 2-12) • School of Higher Learning • Head Start Includes the configurable option to allow nurse to enter student historical immunization data directly into registry.				
X.IWEB SP v4.3	IWeb v4.3 Service Pack	Service Pack that includes all of the IWeb product enhancements for IWeb v4.3. Includes updates for IWeb Core functionality and IWeb-related Modules.	\$ 631,900	\$ 126,380	Internet Browser-based	User Manual
X.IWEB SP v4.4	IWeb v4.4 Service Pack	Service Pack that includes all of the IWeb product enhancements for IWeb v4.4. Includes updates for IWeb Core functionality and IWeb-related Modules.	\$ 204,000	\$ 40,800	Internet Browser-based	User Manual
X.IWEB SP v4.5	IWeb v4.5 Service Pack	Service Pack that includes all of the IWeb product enhancements for IWeb v4.5. Includes updates for IWeb Core functionality and IWeb-related Modules.	\$ 91,500	\$ 18,300	Internet Browser-based	User Manual
X.IWEB SP v4.6	IWeb v4.6 Service Pack	Service Pack that includes all of the IWeb product enhancements for IWeb v4.6. Includes updates for IWeb Core functionality and IWeb-related Modules.	\$ 65,250	\$ 13,050	Internet Browser-based	User Manual
X.IWEB TEMP	Vaccine Storage Automated Temperature Monitoring	Receives and stores refrigerator temperature data from provider sites using electronic monitoring and transmission devices. Produces email or text message notifications to appropriate staff for out of range temperature conditions by specific provider sites.	\$ 175,000	\$ 35,000	Internet Browser-based	User Manual
X.IWEB VFC	IWeb VFC Monitoring/Online Ordering Module	Integrated IWeb application. Provides critical Vaccines for Children (VFC) vaccine inventory and QA/monitoring functionality to include: <ul style="list-style-type: none"> • provider level vaccine ordering via IWeb • QA and monitoring (approval and follow up) of vaccine orders by either county, district/regional or state staff • real-time integration with Vacman 3.0 • additional state level vaccine management reports via IWeb • temperature monitoring data collection (IRMS/Facility Level) and associated reports • Third Party Vaccine Distributor Interface 	\$ 211,750	\$ 42,350	Internet Browser-based	User Manual
X.IWEB.WCM	IWeb Well Child Module	Integrated IWeb application. Allows providers to track important data collected during well child visits. This includes four assessment areas that occur during a visit: physical exam, nutrition (diet and intellectual development), growth and development, and immunizations. Module includes measurements at key milestones from birth to age 18. Also includes screening questions regarding injury prevention, diet, and dental health.	\$ 90,750	\$ 18,150	Internet Browser-based	User Manual
X.IWEB WIC	IWeb/WIC Interface	An interface that links the WIC software and IWeb by querying IWeb for a child's immunization status and returns a message to WIC saying the	\$ 25,000	\$ 5,000	Internet Browser-based	User Manual

Current through Contract Modification #PO-0005, effective March 10, 2009

Product Code	Product Name	Software Description	SIN 132-32 GSA Price	SIN 132-34 GSA Maintenance Price	Equipment List	Documentation
		<p>child is "up to date" or "not up to date." This response is based on the following information:</p> <ul style="list-style-type: none"> • A review of all immunizations a child has received including vaccine type, dose number, and date. • A review of all immunizations a child is overdue to receive based on the IWeb immunization record, including the vaccine type, dose number and date, and a review of all immunizations a child is required to receive (based on the ACIP recommendations) including vaccine type, dose number, and date. <p>It also indicates which vaccines are historical, which immunizations are past due, and which immunizations are due or coming due and when. This information is based on the vaccine forecasting algorithm that is a core function of the IWeb product.</p>				
X.IWEB/AU	IWeb Address Update Module	<p>Utilizes the Post Office's Address Correction System (ACS). Reminder/Recall notices are sent with a unique barcode identifier (key line). If the patient has moved and sent a Change of Address (COA), the notice is sent to the forwarding address and a compiled file of ACS data is made available for the SIIS to download. The Address Update Module enables the file to be uploaded into the central registry and subsequently updates addresses. Does not include Post Office's ACS charge. Please visit the following website for more information: http://www.usps.com/ncsc/addressservices/moveupdate/acs.htm</p>	\$ 42,350	\$ 8,470	Internet Browser-based	User Manual
X.IWEB/FO	Web-based Registry Interface Failover System	Failover system to provide on-line backup in support of operational system.	\$ 62,083	\$ 12,417	Internet browser-based	User Manual
X.IWEBSEC	IWeb Security Module	<p>Add-on security pack for IWEB, supports HIPAA, provides reporting tools for registry administrators: Determine who changed what records and when. Including the ability to track:</p> <ul style="list-style-type: none"> • Bad Login Attempts • Record edit history • User activities <p>In addition, the Security Module allows archiving of patient records based on date of birth. The module is HIPAA compliant and can link with the UFM to provide automatic message of critical information to the administrator.</p>	\$ 46,479	\$ 9,296	Internet Browser-based	User Manual
X.LIM	Lead Interface Module	Provides additional screening page to display lead blood level data and other key lead testing information. Additional customizations include parent letters and mapping capabilities.	\$ 15,125	\$ 3,025		User Manual On-line Help
X.LINK	SIIS and SENTINEL Link	An automated interface to a state's Communicable Disease Registry. This interface will support the following: Given a vaccine preventable disease is reported an automatic immunization query will be generated for the specific patient and/or other individuals that may reside at the given address. The query will return the immunization records, which in turn will be made available to the case investigator.	\$ 87,647	\$ 17,529	Internet Browser-based Backend database requires Oracle	User Manual On-line Help

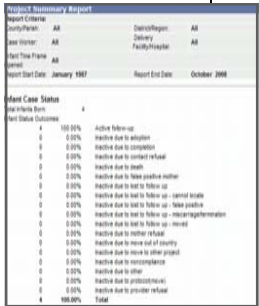

Product Code	Product Name	Software Description	SIN 132-32 GSA Price	SIN 132-34 GSA Maintenance Price	Equipment List	Documentation
X.LOTS	Land Ownership Tracking System	Land Ownership Tracking System (LOTS) - Indian Lands Management Version This client-server solution allows the management, and reporting of ownership interests in land tracts. The system facilitates transfer of monetary and acquired interests in these land tracts. Deeds and liens related to Indian Lands Consolidation Act of 2000 (ILCA) can be created based on transfer of all or part of the interest in inventoried tracts. Subsequent lien payments are accepted and tracked until satisfaction. The system has integrated GIS. The system is based on MS Visual Basic and utilizes MS Access, Word, and ESRI's MapObjects. Future versions of IDFACTS will utilize Oracle 8.0 (or later) or MS SQL Server 2000 in place of MS Access. DEPRECATED.	\$ 67,155	\$ 13,431	OS: Windows <u>Computer:</u> 1 GHz Pentium 512 MB Ram 20 GB HD PC requires Microsoft Office for printing	User Manual
X.MASSIMM	Mass Immunizations Standalone, Windows version	Field application to quickly conduct entry of demographic and vaccination information gathered in mass immunization situations. Vaccine lot data can be loaded prior to field use and data captured in the field can be uploaded for follow-up, outreach, or inventory purposes. The interface is optimized for speedy entry of an appropriately limited set of data elements. Can be loaded on a thumb drive.	\$ 59,760	\$ 11,952	Thumb drive compatible	User Manual
X.MASSIMM/WEB	Mass Immunizations Web version	Field application to quickly conduct entry of demographic and vaccination information gathered in mass immunization situations. The interface is optimized for speedy entry of an appropriately limited set of data elements. Reports, reminder/recall, and other assessments are conducted from the central registry once loaded with the filed data.	\$ 73,039	\$ 14,608	N/A	User Manual
X.MPI	Master Patient Index 	A tool for supporting the integration of public health data sets. This Master Patient Index application integrates with deduplication to further support the identification of individual records. Enterprise-wide licenses are available.	\$ 114,950	\$ 22,990	Internet Browser-based	User Manual On-line Help
X.MPI.CDR	MPI Interface/CDR	A tool that allows STC's Communicable Disease Reporting (CDR) application to communicate with the Master Patient Index. The interface allows the CDR to send and receive patient updates and receive patient merge and unmerge notifications from the Master Patient Index. Price - same as MPI Interface for SIIS. DEPRECATED.	\$ 48,400	\$ 9,680	Internet Browser-based	User Manual On-line Help
X.MPI.EHDS	Master Patient Interface - EHDS	A tool that allows STC's Environmental Health System application to communicate with the Master Patient Index. The interface allows the CDR to send and receive patient updates and receive patient merge and unmerge notifications from the Master Patient Index. DEPRECATED.	\$ 48,400	\$ 9,680	Internet Browser-based	User Manual On-line Help
X.MPI.HEPB	Master Patient	A tool that allows STC's HepB application to communicate with the	\$ 48,400	\$ 9,680	Internet	User Manual

Current through Contract Modification #PO-0005, effective March 10, 2009

Product Code	Product Name	Software Description	SIN 132-32 GSA Price	SIN 132-34 GSA Maintenance Price	Equipment List	Documentation
	Interface - HepB	Master Patient Index. The interface allows the HepB to send and receive patient updates and receive patient merge and unmerge notifications from the Master Patient Index. DEPRECATED.			Browser-based	On-line Help
X.MPI.SIIS	Master Patient Interface - SIIS	A tool that allows the immunization registry to communicate with the Master Patient Index. The interface allows the immunization registry to send and receive patient updates and receive patient merge and unmerge notifications from the Master Patient Index.	\$ 48,400	\$ 9,680	Internet Browser-based	User Manual On-line Help
X.MPI/HIE	Master Patient Interface - Health Information Exchange	Enterprise-level MPI that supports health information exchange; can be deployed in federated, standalone, or hybrid manner.	\$ 280,500	\$ 56,100 Maintenance covers software product only; does not cover changes to data trading partner interface.	N/A	Technical Manual
X.MPR	Management Reports and Performance	Standardized management and performance reports identifying a variety of key indicators specific to SIIS activities: Pockets of need, immunization status by age, category, and population-based statistical summaries. The module includes the capability to generate comparable maps using the GIS plug in. Immunization and communicable disease reporting versions exist.	\$ 80,708	\$ 16,142	Internet Browser-based	User Manual
X.NBS	New Born Screening Interface Module	Provides specific lab based New Born Screening information to display newborn metabolic and hearing screening data. Utilizes existing registry interfacing capabilities with other public health datasets. Additional customizations include prompts for providers regarding standards of care.	\$ 36,300	\$ 7,260	Internet Browser-based	User Manual On-line Help
X.OCR	OCR Interface	Vaccine management tool allows providers to conduct vaccine management activities, e.g., reconciliation, ordering distribution. Integrates directly with the immunization registry.	\$ 258,500	\$ 51,700	OCR	User Manual
X.OMS	Stand-alone Outbreak Management System	Stand-alone outbreak management system (OMS). DEPRECATED.	\$ 878,790	\$ 175,758	Internet Browser-based	User Manual Technical Manual
X.OOM	Opt Out Module	The Opt Out Module provides the ability for the registry to track persons who have opted out of the registry without marinating any identifying information within the Central Registry. It consist of two main pieces: (1) "Opt Out" functionality consisting of: a. The ability to add anonymous patients for the purposes of i. Tracking Vaccine Inventory ii. Accurate CASA Assessments b. The ability for Administrative Level access to opt a person out of the registry c. The ability for Administrative Level access to opt a person back into the registry (2) An opt-out database	\$ 74,415	\$ 14,883		User Manual On-line Help

Product Code	Product Name	Software Description	SIN 132-32 GSA Price	SIN 132-34 GSA Maintenance Price	Equipment List	Documentation
		This database provides a holding place outside of the Central Registry where identifying patient information for those patients who have opted-out of the registry to be held. Collecting these records will benefit the registry in that, all imported records (via the DTT) will first check this opt-out database to ensure that patients who have opted-out, will not get re-entered.				
X.PAM PLATFORM	Program Area Module Platform	PHIN-based Program Area Module (PAM) for building disease-specific case management systems.	\$ 250,000	\$ 50,000	Internet browser-based	User Manual
X.PAM/HEPB	Hep B Case Management Application	PHIN-based PAM for Hepatitis B case management. An Internet based application that tracks hepatitis positive tested mother. Also provides integration with an immunization registry to target children of these mothers.	\$ 79,679	\$ 15,936	Internet Browser-based Relational backend database	User Manual On-line Help
						
X.PAM/HIV	Program Area Module - HIV	Program Area Module (PAM) for HIV/AIDS.	\$ 145,000	\$ 29,000	Internet browser-based	User Manual
X.PAM/LEAD	Program Area Module - Lead	Program Area Module (PAM) for Lead.	\$ 159,500	\$ 31,900	Internet Browser-based	User Manual
X.PAM/STD	Program Area Module - STD	Program Area Module (PAM) for STD.	\$ 357,500	\$ 71,500	Internet Browser-based	User Manual
X.PAM/TB	Program Area Module - TB	Program Area Module (PAM) for TB. 	\$ 159,500	\$ 31,900	Internet Browser-based	User Manual

Current through Contract Modification #PO-0005, effective March 10, 2009

Product Code	Product Name	Software Description	SIN 132-32 GSA Price	SIN 132-34 GSA Maintenance Price	Equipment List	Documentation
X.PAPER	Paper Data Entry	Provides streamlined Web interface for entry of immunization records received from providers on paper. Target users are those entering a limited set of data elements and need to quickly switch between providers without logging in as the submitting provider.	\$ 46,479	\$ 9,296	Internet based	User Manual
X.PCI	PCImmunize Client Server Stand-Alone	PCImmunize-2000 Client Server is a provider/clinic-based immunization registry system. This complete registry provides the ability to: add, edit, and delete patients and immunization records, track administered and historical immunizations, forecast and conduct reminder / recall, link to CDC's CASA for assessments, a full compliment of reports >500 combinations are possible, identification duplicate records, and export, import and query the central database SIIIS. This is a single user version and includes the database Oracle. DEPRECATED.	\$ 2,253	\$ 451	Client: Pentium 100 MHz Server: NT UNIX	User Manual On-line Help Installation Manual
X.PCI LAN	PCImmunize Client Server Local Area Network	The Local Area Network version of PCI-2000 supports 5 users in a clinic or provider setting. This LAN version includes Oracle. DEPRECATED.	\$ 6,828	\$ 1,366	Pentium 100 MHz	User Manual Installation Manual
X.PCIC	PCImmunize Companion	The PCI-Companion (PCIC) allows healthcare providers to export data from their Practice Management Systems to PCI-2000. Daily patient encounters can be exported automatically to minimize double entry of data. DEPRECATED.	\$ 684	\$ 137	Pentium 100 MHz	User Manual
X.PDA	Wireless Web Access to X.SIIS	Web application designed for the "Pocket PC" standard PDA. Provides access to the registry from the wireless, hand-held device. Supports searching for patients, viewing vaccination history/forecast, updating the demographic and shot record. DEPRECATED.	\$ 99,598	\$ 19,920	Pocket PC Type of PDA, wireless modem and ISP service	User Manual
X.PHDir	Public Health Directory	A Public Health Directory and Single Sign-on server. It implements the Public Health Directory schema, as defined by the CDC, allowing a department of health to manage information about public health workers and public health organizations. External applications can access information through a SOAP interface and use X.PHDir is an authentication service simplifying management of passwords and user information. Runs on Unix platform preferably. DEPRECATED.	\$ 60,500	\$ 12,100		User Manual On-line Help
X.PM	Parental / Guardian Module of X.IWEB	Allows parents or guardians to review the immunization records of their children and to receive a forecast of vaccines due. Automatically notifies parent provider through an e-mail if the child were due for a specific immunization. A notice would be presented to the parent that indicated the provider would be notified and that the parent should schedule an appointment. A notice would be presented that told the parent how to correct the information on file if it did not match their records.	\$ 116,862	\$ 23,372	Internet Browser-based	User Manual On-line Help
X.PMM	Provider Mapping Module	The Provider Mapping Module allows data from large, aggregate data sources, such as Medicaid and health plans, to be associated with the original provider for data ownership purposes. The primary objective of this module is to allow electronic data collection through third	\$ 42,350	\$ 8,470	Internet Browser-based	User Manual On-line Help

Current through Contract Modification #PO-0005, effective March 10, 2009

Product Code	Product Name	Software Description	SIN 132-32 GSA Price	SIN 132-34 GSA Maintenance Price	Equipment List	Documentation
		parties for providers that do not currently have their own electronic data collection / reporting mechanisms.				
X.PNO	Pre-natal Outreach Web version	Tracks outreach, education and referral services conducted by programs such as Health Start. Register clients, track encounters, births, and family follow-up visits. Provides billing justifications for agencies billing for lay health worker services.	\$ 59,760	\$ 11,952	Internet Browser-based	User Manual
X.PREMP	Population Screening Management Application	<p>Population-based screening management application that incorporates all elements of the screening process, including evidence-based screening, follow-up guidelines, and recruitment and retention strategies to maximize participation. The system's comprehensive quality assurance supports optimal program operation, monitoring and evaluation. Features include:</p> <ul style="list-style-type: none"> • Supports operational management of screening program(s). • Facilitates access to data from multiple and diverse sources. • Identifies population that needs to be screened based on configurable risk profile. • Actively recruits and reminds participants to be screened. • Tracks and notifies patients of results. • Actively recruits and reminds patients to be re-screened at set intervals. • Operational reporting and decision support tools for stakeholders. • Configurable and flexible to meet the needs of different screening programs (e.g. colorectal cancer, breast cancer, cervical cancer.) 	\$ 450,000	\$ 90,000	Internet browser-based	User Manual
						
X.PREMP1	Population Screening Management Application, License Pack	Additional User Licenses, Block of 25, for Population Screening Management Application (X.PREMP).	\$ 100,000	\$ 20,000	Internet browser-based	User Manual
X.RC SITE	Remote Clinic	The Remote Clinic application is used to add and update patient and vaccination information from a clinic where Internet access is not possible. The Remote Clinic computer has specific information downloaded from the central registry and allows the clinic user to access patients and determine which vaccinations they have received. Periodically, the new data is uploaded back to the central registry. Requires Oracle Personal licensing for database functionality. DEPRECATED.	\$ 1,815	\$ 363	Browser-based	User Manual On-line Help
X.RC STATE	Remote Clinic State	The Remote Clinic Module allows public and private providers to conduct off-site clinics in locations that do not have internet access (such as malls). A snapshot of the patients and vaccinations in the registry are loaded on a laptop. This allows remote clinic users to search existing patients and vaccinations to avoid unnecessary revaccination, as well as reconcile their local vaccine inventory. Remote Clinic users can enter patients, vaccinations, and run reports. After the remote clinic is complete, the data is uploaded back to the	\$ 46,479	\$ 9,296	Browser-based	User Manual On-line Help

Current through Contract Modification #PO-0005, effective March 10, 2009

Product Code	Product Name	Software Description	SIN 132-32 GSA Price	SIN 132-34 GSA Maintenance Price	Equipment List	Documentation
		central registry.				
X.RISK	At Risk Evaluation Module	Utilizes demographic and patient immunization records to identify populations at risk to specific disease outbreaks such as West Nile or SARS, or BT events. This would interface with the surveillance efforts and as diseases are reported the on going at risk assessment would be occurring in the background. This module would build upon the existing GIS tools.	\$ 175,293	\$ 35,059	Internet Browser-based	User Manual On-line Help
X.RLS	Record Locator Service	Record locator that supports the deployment of Health Information Exchange (HIE) projects.	\$ 137,500	\$ 27,500	N/A	Technical Manual
X.RM	Report Module for PCI-2000	Allows the PCI-Client user to generate a variety of reports. DEPRECATED.	\$ 37,848	\$ 7,570	NT UNIX	User/ Administrator Manual
X.SEC	Security Module	Add-on security pack for SIIS and CDR, supports HIPAA, provides reporting tools for registry administrators: Determine who changed what records and when. Logs failed login attempts. Allows archiving of patient records based on date of birth. Links with X.FM providing automatic message of critical information to the administrator. DEPRECATED.	\$ 46,479	\$ 9,296	N/A	User Manual
X.SENTINEL	SENTINEL 	Core component for a Web-based, PHIN/NEDSS compliant, communicable disease reporting system. Provides authenticated users with the ability to enter disease reports, case investigations, and laboratory results through an Internet based user Interface. Utilizes GIS, duplicate identification, automated detection, and alerts. Customizable and integratable into local statewide surveillance systems to include linkages with statewide immunization projects and the STC X.IWEB products. Core supports up to 25 users.	\$ 255,636	\$ 51,127	Internet Browser-based Relational backend database	User Manual On-line Help
X.SENTINEL1	SENTINEL License Pack	Additional User Licenses Block of 1,000 for SENTINEL (X.SENTINEL).	\$ 339,405	\$ 67,881	Internet Browser-based	User Manual On-line Help
X.SENTINEL/ ALERT	SENTINEL Alerting	Enhanced alerting capability, including SOAP interface to call external Health Alert Network systems. Alerting enhanced to include statistical, population rate-based rules.	\$ 79,255	\$ 15,851	Internet Browser-based	User Manual On-line Help
X.SENTINEL/ LEGACY	Legacy Program Support	Data Exchange support for legacy program systems conversion of TB, STD, communicable disease.	\$ 114,103	\$ 22,821	Internet Browser-based	User Manual On-line Help
X.SENTINEL/CT	SENTINEL Contact Tracing	Integrates with human case integration and provides contact linking and searchability.	\$ 259,050	\$ 51,810	Internet Browser-based	User Manual
X.SENTINEL/DB	SENTINEL Database	A relational database built upon the CDC logical data model (LDM) standards to support Web-based disease reporting.	\$ 372,497	\$ 74,499	Internet Browser-based	User Manual On-line Help
X.SENTINEL/DOC	SENTINEL Document Support	Document Support includes multiple attachments, multiple morbidity reports, and case linking.	\$ 107,690	\$ 21,538	Internet Browser-based	User Manual On-line Help

Current through Contract Modification #PO-0005, effective March 10, 2009

Product Code	Product Name	Software Description	SIN 132-32 GSA Price	SIN 132-34 GSA Maintenance Price	Equipment List	Documentation
X.SENTINEL/ELR	SENTINEL ELR Interface	LIMS integration suite for current HL7 ELR messages.	\$ 193,050	\$ 38,610	N/A	Technical Manual
X.SENTINEL/ELR/ CMS	SENTINEL LIMS Code Management Suite	Module to manage and map local LIMS code sets to CDC standards, e.g., SNOMED and LOINC. Supports interactive and on-going code mapping.	\$ 94,050	\$ 18,810	Internet Browser-based	User Manual
X.SENTINEL/EM	SENTINEL Electronic Messaging	This disease surveillance system feature allows the electronic exchange of reportable diseases via a NETSS or PHIN messaging format.	\$ 44,770	\$ 8,954	Internet Browser-based	User Manual On-line Help
X.SENTINEL/FLOW	SENTINEL User Configurable Workflow Processes	User configurable case processing rules to automate high volume processes.	\$ 117,794	\$ 23,559	Internet Browser-based	User Manual On-line Help
X.SENTINEL/FO	Communicable Disease Reporting Failover System	Failover system for backup of operational system.	\$ 51,127	\$ 10,225	Internet Browser-based	User Manual
X.SENTINEL/GI	SENTINEL Geocoder Interface	Tools to interface with 3 rd party geocoders.	\$ 39,050	\$ 7,810	N/A	Technical Manual
X.SENTINEL/NET	Distributed SENTINEL Interfaces	User work interfaces for case processing, case submission, record management services are exposed through secured network interface to allow distributed deployment of multiple SENTINEL systems. Allows jurisdictional autonomy and independent mobile clients.	\$ 175,450	\$ 35,090	N/A	User Manual
X.SENTINEL/NND	SENTINEL National Notifiable Disease Data Set	SENTINEL product for collection of communicable disease data through online forms (i.e., PDF) for CDC's standard set of National Notifiable Diseases.	\$ 190,575	\$ 38,115	Internet Browser-based	User Manual On-line Help
X.SENTINEL/PMIM	SENTINEL, PHIN-MS Integration Module and MS Extension	Enables SENTINEL to communicate messages with PHIN-MS, includes PHIN MS extension for automated sending of HL7 messages from submitter files.	\$ 133,100	\$ 26,620	N/A	Technical Manual
X.SENTINEL/SUI	SENTINEL Secondary User Interface	Case and laboratory data entry for secondary users, i.e., hospital and 3 rd party laboratories.	\$ 159,500	\$31,900	Internet Browser-based	User Manual
X.SENTINEL/XIE	Cross-border Information Exchange	Cross-border public health information exchange system that gathers inter-jurisdictional disease information, provides alerting and notifications, and supports case and outbreak management through information exchange. Links to statewide disease notification systems. Can be integrated with Program Area Module (PAM) Platform.	\$ 375,000	\$ 75,000	Internet browser-based	User Manual

Product Code	Product Name	Software Description	SIN 132-32 GSA Price	SIN 132-34 GSA Maintenance Price	Equipment List	Documentation
X.SER	Serology	Serology provides functionality within the IWeb system to record Titers testing information and evidence of immunity. The following information can be recorded: <ul style="list-style-type: none"> • Name of Disease • Draw Date • Facility • Interpretive Result • Titer Value • Reference Range 	\$ 55,000	\$ 11,000	Internet Browser-based	User Manual
X.SIGGIL	Land Parcel Ownership and Taxation Tracking System	A client-server solution that allows the loading, management, and reporting of parcel ownership and tax burden within communities. The system has integrated GIS. Available remotely sensed data sets are a great advantage to load the system. The system is based on Visual Basic and utilizes the Access database from Microsoft. The core component supports 25 users. DEPRECATED.	\$ 120,395	\$ 24,079		
X.SIIS/DB	Immunization Registry Database	A relational database system, specific to immunizations. Supports statewide user's licenses; adheres to national standards consistent with CDC's Public Health Conceptual Data Model; and integrates into data warehousing projects.	\$ 372,497	\$ 74,499	Relational database	System Manual
X.SNSTRACKING	Strategic National Stockpile Tracking System	Web based application for use in tracking the distribution of the Strategic National Stockpile in response to public health emergencies. Provides tracking of the SNS from the point of request to CDC through distribution to the dispensing sites. Other features include: Receiving, Inventory Management at RSS, Reordering for the RSS, Ordering for sites, Allocating, Staging, Logistics to distribution nodes, Hand-off to dispensing sites and treatment centers, recovery of unused medical materials. Application provides licenses for up to 25 users. Additional licenses can be purchased in blocks of 25.	\$ 154,953	\$30,991	Internet Browser-based	User Manual
X.SNSTRACKING1	Strategic National Stockpile Tracking System License Pack	License Pack (25)	\$ 3,872	\$ 774	N/A	

Product Code	Product Name	Software Description	SIN 132-32 GSA Price	SIN 132-34 GSA Maintenance Price	Equipment List	Documentation
X.SOMS/PRODUCT	SENTINEL Outbreak Management System	Outbreak management system (OMS) that integrates with SENTINEL. 	\$ 384,890	\$ 76,978	Internet Browser-based	User Manual Technical Manual
X.UM	Usage Monitor Module	Provides metrics to support provider access and usage of SIIS.	\$ 59,760	\$ 11,952	N/A	User Manual On-line Help
X.VAERS	VAERS Interface	A module that electronically interfaces with the CDC Vaccine Adverse Events Reporting System (VAERS). As an adverse reaction is entered, the user has the option to complete a VAERS specific form and electronically transmit this to the CDC VAERS system. It will handle anti-viral adverse events. This is considered a critical item and very important for tracking new vaccinations.	\$ 79,679	\$ 15,936	Internet browser-based Relational backend Database	User Manual On-line Help
X.VAS	Vocabulary Authoring System	A PHIN-compliant toolkit to address the needs of public health applications related to centralized management of standard and local vocabularies. Provides analysis of the existing vocabularies and development of standardized vocabularies with mappings.	\$ 75,000	\$ 15,000	Internet browser-based	User Manual
X.VFM	Vaccination Forecasting Module	Vaccination forecasting based on ACIP immunization schedules. May be integrated with existing Oracle-based registry systems. Forecasting module assesses valid vaccinations based on criteria established by ACIP guidelines. Generates next recommended immunization date based on the existing valid vaccinations in the immunization record. Requires integration services for registry compatibility modifications.	\$ 54,450	\$ 10,890	Internet Browser-based	User Manual On-line Help
X.VOMS	Vaccine Ordering Management System	Complete vaccine management system for vaccine ordering, vaccine accountability, and distribution. Integrates directly with immunization registries. 	\$ 302,500	\$ 60,500	Internet browser-based	User Manual
