

The Scientific Technologies Corporation (STC) Tuberculosis Patient Management Tool software solution, TB-Sentinel, is a comprehensive tuberculosis case management tool that provides extended reporting and case management capabilities specific to tuberculosis cases. TB-Sentinel conforms to the most current RVCT requirements established by the CDC. The case management component in TB-Sentinel includes data collection in the following core areas:

- ➔ Patient/client personal information.
- ➔ Case reporting information.
- ➔ Client Assessment (includes Risk Assessment and Medical History).
- ➔ Lab and X-ray.
- ➔ Medication treatment regime.
- ➔ Intervention Tracking.
- ➔ System audit log.
- ➔ Contact tracing component.
